

## Substance Abuse Treatment and/or Education Program

If more than 3 sessions are missed, the client is in danger of termination. Clients will be advised prior to the discharge that attendance is a problem.

If the client fails to show for services within 30 days, treatment is terminated. The client can be readmitted. A new intake may need to be completed with treatment starting again.

Clients are expected to remain alcohol and drug free. This includes prescribed mood-altering drugs unless admitted with a dual-diagnosis. An inability to remain abstinent will result in a referral to a more intensive treatment program and/or termination.

Clients are expected to submit random urinalysis and breathalyzers upon request. Positive results will be reported to the referral source (excluding self referrals).
